

# RES MEDICA

Journal of the Royal Medical Society

## Editorial

**David Griffith**

Editor

### Abstract

For the first time in recent memory, Res Medica has been published twice in a single academic year. A brief glance at the articles shows that those responsible for this are the members – the majority of the articles this time around have come from people involved with the society in some capacity.

Book Review	<i>Marion A Simpson</i>	28

## Editorial

For the first time in recent memory, *Res Medica* has been published twice in a single academic year. A brief glance at the articles shows that those responsible for this are the members – the majority of the articles this time around have come from people involved with the society in some capacity.

We will always need material for the next issue. As the journal is written for and by the society, we welcome contributions from any of the members. This request extends especially to those members who, now qualified, are working away from Edinburgh. Your knowledge and

experience may be invaluable to future doctors, as well as of great interest to your contemporaries.

We also need people to help produce the journal in years to come. Most of the current team are approaching their final year at Edinburgh. Anyone who thinks they can help out will be very welcome – look out for notice of committee meetings, or get in touch with one of us.

Enjoy the issue.
