# **HISTORICAL SESSION**

Opening Address by the Chairman  
Dr. R. B. L. Ewart

Senior President, may I thank you for your kind introduction, and may I also extend my thanks to the Presidents and members of the Royal Medical Society for giving me the honour to chair this first session of the symposium. It is now my very pleasant duty to introduce our first speaker – Mr. Robin Hunter, who is a notable member of the Royal Medical Society. Mr. Hunter recently interrupted his medical studies to pursue a course leading to his graduation – with first class honours – in Pharmacology and amongst his distinctions he is Lauder Brunton Memorial prize winner and medalist of 1966. It is therefore particularly apposite that he has chosen “Lauder Brunton” as his subject for this symposium.
